

ISO27002 Assessment

ABOUT

ekko Consulting, Inc. specializes in the implementation of Information Security Management Systems based on the ISO27002 specification and ISO27001:2005 certification standards.

METHODOLOGY

Utilizing ISO27002 and our consultants' information security, compliance and audit experience we:

1. Work with you to define the scope of the assessment,
2. Perform the analysis
3. Develop your reports and present findings
4. Work with you to define your action plan and strategy

EXPERIENCE

EKKO is the leading ISO27001 consulting organization in the Bay Area and on the West Coast. We have successfully helped Enterprise organizations become certified to ISO27001.

We represent many Enterprise organizations in providing internal audit and compliance services.

INTRODUCTION

ISO27002:2005 Code of Practice for Information Security Management is the new name for ISO17799 under a series of ISO27000 standards from the International Standards Organization. The ISO27002 International Standard has been prepared to provide information security best practices guidelines and potential controls for implementation.

ARE YOU READY FOR ISO27001

Before embarking on an ISO27001 certification process or as part of information security best practices it is good practice to establish an information security baseline; from which you can measure your information security environment and management processes.

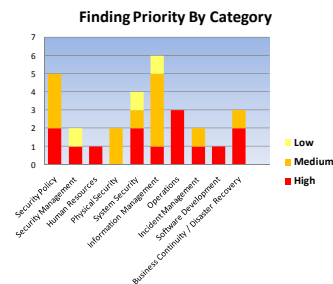

BENEFITS

- Baseline your environment
- Learn and understand high risk areas
- Obtain a plan from which you can improve your information security environment.
- Learn where and how to improve security processes
- Prioritize your security activities and projects
- Baseline your information security program against other organizations and industry maturity models

ASSESSMENT FOCUS AREAS

EKKO's security assessment's are performed within the following areas

1. Security Policy
2. Security Management
3. Human Resources
4. Physical Security
5. System Security
6. Information Management
7. Operations
8. Incident Management
9. Software Development
10. Business Continuity / Disaster Recovery
