EKKO's 10 step certification process

1. ISO27001 Baseline
2. ISMS Design
3. Certification Planning
4. ISMS Documentation
5. Risk Assessment
6. Training
7. Implementation
8. Internal Review
9. Stage 1 & 2 Audit
10. ISO27001 Certification

IT RISK MANAGEMENT

Risk management is the foundation for implementing a good information security management system. Designed and executed appropriately a good risk management program can reduce costs, enhance security and provide a common framework from which appropriate IT security, compliance and business decisions may be made.

ISO27002 ASSESSMENTS

Baseline your organization's information security and management posture with EKKO's ISO27002 based assessments. Prioritized and meaningful deliverable results ensure you have the information you need to improve your organization's information security and processes.

IT METRICS, REPORTING AND DASHBOARDS

Identify key metrics and data points from which you can start analyzing and trending security integrity and IT performance. Ensure process, people and technology investments are working and improving as expected.

DISASTER RECOVERY / BUSINESS CONTINUITY

Develop BCP & DR plans to reduce your risks to an acceptable level. EKKO's experienced consultants lead you through the BCP/DR process and define a scope that is right for your business and budget. We perform a scope analysis, business impact assessment, identify risks and develop BCP/DR plans and testing.
